

Clarity D3

DATA DRIVEN DISINFECTION™

Clarity D3 remote management application provides full visibility into the operation of your devices and assessment of the cleanliness of your spaces.

Clarity D3 enables Data Driven Disinfection and is your on-ramp to state-of-the-art remote control, monitoring and asset management tools. Program and monitor SteriLumen devices and view current reports from your office or mobile device.

Clarity D3 provides data at your fingertips: graphical reports on device sterilization cycles, uptime, exception tracking and maintenance needs give peace of mind that targeted areas are clean and ready for your clients, employees and associates.

Each of your SteriLumen devices is automatically registered with the initiation of Clarity D3, enabling us to provide the best service and support for your business.

Essential Reporting

- Device and enterprise reporting on efficacy: disinfection validation

Simple Management

- Track devices across the enterprise
- Remote monitoring & operations
- Customize disinfection schedule

Smart Maintenance

- Cartridge lifecycle alert
- Fault Detection
- Automatic system updates
- Automated set up and registration
